Portuguese residence permit and work authorization; no sponsorship required | Eligible to live and work in Brazil | Remote roles only

PROFESSIONAL SUMMARY

Lead Platform and Site Reliability Engineer with more than 10 years of experience building and operating cloud infrastructure across AWS, Kubernetes, ECS Fargate, Terraform, AWS CDK, CI/CD, and observability. CKA and CKAD certified. Working fully remotely since 2019 with asynchronous teams distributed across Latin America, Europe, and Asia. Builds reliable delivery platforms, automates operational work with Python, and partners with developers on production reliability and developer experience.

CORE EXPERTISE

AWS PLATFORM ENGINEERING | KUBERNETES / EKS | ECS FARGATE | TERRAFORM / AWS CDK | GITOPS / CI/CD | RELIABILITY / SLOs | OPENTELEMETRY | PYTHON AUTOMATION | DEVELOPER PLATFORMS

CERTIFICATIONS

CKA - Certified Kubernetes Administrator, The Linux Foundation | CKAD - Certified Kubernetes Application Developer, The Linux Foundation

PROFESSIONAL EXPERIENCE

Arionkoder / iSeatz | Lead Platform Engineer | Aug 2023 - Present

- Architect and operate AWS platforms across EKS and ECS Fargate, using Terraform, AWS CDK, and CloudFormation to create reusable, self-service infrastructure patterns.
- Build and maintain multi-stage delivery pipelines with AWS CodePipeline and Azure Pipelines, including blue/green and canary strategies for zero-downtime deployments.
- Improved incident diagnosis with OpenTelemetry, Sumo Logic, OpenSearch, and Grafana. Better alerting and log correlation reduced MTTR.
- Support production services written in Rust and Elixir and partner with development teams on reliability and developer experience.

Lumenalta | Senior DevOps Engineer | Aug 2021 - Aug 2023

- Scaled production workloads on Amazon EKS and ECS Fargate with Helm and Terraform, including VPC, Route 53, ALB, and PrivateLink networking.
- Built GitOps delivery pipelines with CircleCI and Bitbucket, plus immutable AMI workflows with Packer and secrets management with AWS Secrets Manager.
- Implemented telemetry and SLO tracking with Prometheus, Grafana, Azure Log Analytics, and CloudWatch. Automated recurring operational work with Python and Bash.

Navisite / Velocity Technology Solutions | Senior DevOps Engineer | Mar 2020 - Aug 2021

- Operated EKS and hybrid Linux and Windows infrastructure across AWS, OCI, and VMware vSphere, with Terraform, Puppet, Packer, Docker, and Ruby automation.
- Maintained GitLab CI pipelines and production monitoring with Checkmk and Grafana, supporting infrastructure operations for a distributed international team.

EARLIER EXPERIENCE

Codeminor42 | Site Reliability Engineer | Sep 2019 - Mar 2020

- Operated Kubernetes environments built with Kops, GKE, and DigitalOcean Kubernetes, using Helm, Docker, Terraform, and Bash across AWS, GCP, DigitalOcean, and Heroku.
- Defined SRE metrics, maintained Prometheus Operator and Grafana, improved incident runbooks, and managed delivery workflows with GitLab CI.

Hapvida SA | Solutions Architect / DevOps Advocate | Apr 2018 - Sep 2019

- Introduced container and microservice platforms with Docker, AKS, and Istio, alongside Node.js REST APIs, Azure API Management, and Azure Functions.
- Provisioned Azure and VMware vCloud environments with Terraform and Ansible, centralized logs in Graylog, and built delivery pipelines with GitLab CI and Jenkins.

Bebblue | SRE / DevOps | May 2017 - Apr 2018

- Built AWS and Azure infrastructure with Terraform, Ansible, and Packer across EC2, ECS, RDS, S3, DynamoDB, Lambda, API Gateway, Route 53, CloudFront, and autoscaling services.
- Ran delivery and operations with CircleCI, Drone, Bitbucket Pipelines, ELK, New Relic, CloudWatch, RabbitMQ, SQS, Nginx, and relational databases.

Magazine Luiza / LuizaLabs | Sysadmin / DevOps | Aug 2016 - May 2017

- Administered Linux, FreeBSD, Windows, Docker, VMware, and Hyper-V environments, plus AWS services including EC2, VPC, RDS, S3, SQS, ElastiCache, and Lambda.
- Automated infrastructure with Terraform, Ansible, Rundeck, Python, and shell; maintained Jenkins, Travis CI, and CircleCI pipelines with New Relic and Zabbix monitoring.

Linx Sistemas S/A | Infrastructure Analyst | 2013 - 2016

- Administered Windows Server, Linux, FreeBSD, Active Directory, DNS, DHCP, VMware, Hyper-V, Apache, Nginx, IIS, and enterprise LAN/WAN services.
- Supported MySQL, PostgreSQL, SQL Server, Docker, and AWS, with Nagios, Cacti, and Zabbix monitoring and automation in Python, PowerShell, and shell.

TECHNICAL SKILLS

Cloud: AWS (EKS, ECS Fargate, VPC, Route 53, ALB, RDS, S3, CloudWatch), Azure, OCI

Infrastructure as code: Terraform, AWS CDK, CloudFormation, Ansible

Containers: Kubernetes, Helm, ECS Fargate, Docker, Istio

Delivery: AWS CodePipeline, GitHub Actions, GitLab CI, Azure Pipelines, CircleCI, Jenkins

Observability: OpenTelemetry, Prometheus, Grafana, Sumo Logic, OpenSearch, Datadog, CloudWatch

Languages and automation: Python, TypeScript, Bash/Shell

Data platforms: PostgreSQL, MySQL, DynamoDB, Aurora, Redis, ElastiCache

EDUCATION

Postgraduate Degree, Computer Networks and Systems Security - UNIFAFIBE, 2016

Bachelor's Degree, Information Systems - UNIFAFIBE, 2013
