

LEVI LUGATO

SENIOR PLATFORM / DEVOPS / SYSTEMS ENGINEER

levilugato@gmail.com | github.com/levilugato | levilugato.tech

PROFILE

Senior engineer focused on platform engineering, cloud infrastructure, DevOps, and systems reliability. I turn repetitive operational work into reliable automation across provisioning, delivery, observability, and recovery, reducing manual toil while keeping systems understandable and maintainable.

CORE EXPERTISE

Infrastructure automation	Infrastructure as code	Cloud platforms
Container orchestration	CI/CD and release systems	Observability and SRE

WHAT I DELIVER

Platform foundations. Repeatable cloud infrastructure, sensible guardrails, container platforms, and operational standards designed to help teams self-serve safely.

Release systems. Delivery pipelines with short feedback loops, traceability, security controls, and clear rollback paths.

Operational clarity. Observability and reliability practices that turn noisy systems into actionable signals and support fast recovery.

TECHNOLOGY

Platform and code

AWS, AWS CDK, TypeScript, Python, Terraform, Kubernetes, Docker, Helm, Linux

AWS services

EKS, ECS, Lambda, API Gateway, VPC, IAM, S3, CloudFront, Route 53, RDS, DynamoDB, SQS, SNS, Step Functions, CloudWatch, Secrets Manager

Delivery and observability

GitLab CI, GitHub Actions, OpenTelemetry, Prometheus, Grafana

WORKING PRINCIPLES

Small feedback loops. Clear ownership. Documented decisions. Automation that removes toil without hiding the system.
